Librarian's Report

During 1931 Flint Public Library has been opened to the public the usual library hours. The total circulation of books has been 10,032, an increase of 859 over that of 1930. The same magazines have been on the reading table as during 1930.

At the Grammar School graduation in June the library was much pleased to award certificates to fifteen pupils of Grade 8 and to six pupils of Grade 7.

Pupils of Grade 8 who read twenty books, five of which were non-fiction were Mary E. Sullivan and Leonard Campbell.

Those reading ten books were Ernetta Foss and Frances Whittredge. Those reading five books were Alfred Lord, Dorothy Somers, Virginia Kennedy, Roger Leavitt, Hannah Martin, Vito Menesale, Marion Rennard, Ernest Townsend, Sydney Rollins, Richard Goodale, Donald Estey. Beecher Williams of Grade 7 read fifteen books. Those of Grade 7 who read ten books were Angelina Bucario and Barbara Slatery. Muriel Hoelzel, John Ylitalo and Annie Byko read five books.

The books read by these pupils were from the approved State reading list issued by the Division of Libraries of the State Board of Education.

During the year there have been several fine educational picture exhibits loaned by the Woman's Educational Association of Boston.

The librarian wishes to thank the trustees for their loyal support and interest in the general management of the library during the past year.

Annual Statistics

Volumes in library January 1, 1931	9,683

Electric Light Commissioners' Report

We take pleasure in submitting this, our third annual report of this municipal department for the year ending December 31, 1931. Every year since the department has been in operation, has seen an increase in earnings over the previous year regardless of general conditions of prosperity or depression.

Extensive repairs have been made to primary and secondary lines during the year. The maintenance of lines, new construction and street lighting have been satisfactory, and we intend in 1932, to improve and further remedy the faults throughout our distribution system.

It will be necessary for the Town to purchase a constant current transformer for street lighting, this year. The present constant current transformer has nearly a 50% overload, and is subject to failure at any time.

This department has withstood considerable destructive criticism as well as sinister propaganda whose primary purpose was to discredit the municipal maintenance of our distribution system. The factor of maintenance cannot be too strongly emphasized. No electric lighting company can long continue to serve its customers if its distribution system is not properly maintained. The best answer to such propaganda is the actual record of the plant, and the increased efficiency, as shown by the reduction in line losses.

The following set up as taken from the Manager's report, may be of interest to our citizens:

Inventory plant valuation	\$35,018.72
Increase inventory valuation, 1931	4,136.98
Number of customers, 1931	433
Increase in customers in 1931	73
Reduction of line losses and leakages, 1931	4.5%

Amount saved by reduction in line losses, 1931	\$547.50
Reduction of line losses since 1929	12%
Amount saved by reduction in line losses and leakage since 1929, approximately	\$4,930.00
Total Middleton labor, 1931	\$4,263.16
Middleton labor unemployment	\$680.25
Number of transformers in service, 1931	70
Number of poles in service, 1931	862
Number of foreign poles in service, 1931	93
Number of meters in service, 1931	376

During the year we have replaced approximately eight miles of wire, setting 93 poles most of which replaced poles used jointly with the New England Telephone and Telegraph Company. The replacement of poles is necessary because of the fact that the greater part of our poles and distribution lines have been installed for more than fifteen years, the normal life of poles.

Your Electric Light Commissioners entered into a joint agreement with the New England Telephone and Telegraph Company for the custody of all poles held jointly. This greatly decreases the cost of pole maintenance. It is possible for the department to replace its own and joint poles at less than one-half the cost as charged by various companies.

We have reduced the number of attachments to foreign poles during the year, and have changed distribution lines to afford ample clearance, therefore decreasing the hazards to public safety.

In order to insure a continuity of service your department arranged for a breakdown connection with the Town of Danvers in the event of a failure of the normal supply.

At the present time this department has a stock room properly equipped and sufficient to meet the needs of the department.

In accordance with the vote of the Town, new light control street lighting equipment was installed in Middleton Square, which has proved to be very satisfactory, and improves the appearance of the Square.

We desire to take this opportunity to thank all who have contributed to the welfare of this department, as well as the citizens who are our customers, for their good will and co-operation.

Respectfully submitted,

ARCHIBALD L. JONES.

OTTO T. CURRIER.

RICHARD B. FLOYD.

Highway Department Report

To the Honorable Board of Selectmen :

Gentlemen: The Highway Surveyor hereby submits a report for the year ending December 31, 1931. The following are the amounts spent in the various ways on the streets of Middleton :

Dragging	\$ 56 18
Scraping	1,238 78
Gravel	1,393 71
Ledge	4 50
Drainage	456 70
Brush	27 19
Patching, (gravel)	141 57
Patching (bituminous)	770 29
Surface treatment (oil)	968 95
Surface treatment (tar)	2,706 06
Town line signs	57 55
	<hr/>
	\$7,821 66

This includes the special appropriation of \$700 for gravel on Peabody Street and \$200 for surface treatment on Gregory Street.

The amounts spent by streets are as follows:

Boston Street	\$1,082 28
Central “	46 85
East “	1,228 56
Essex “	801 27
Forest “	798 68
Gregory “	304 19
Haswell Park	26 81
King Street	350 83
Lake “	200 00
Liberty “	592 06
Locust “	74 50
Log Bridge Road	4 78
Lowell Street	169 64
Maple “	706 35
Mill “	74 53
No. Main “	63 04
Peabody “	871 49*
Pleasant “	84 96
River “	196 63
School “	144 16
	<hr/>
	\$7,821 66

* Includes special appropriations.

We have used new materials on some of our surface treatments, namely Socony Cut Back Asphalt, (used on Maple and Liberty Streets) and Socony No. 6 oil used on Lake, Essex and King Streets. They have both proven quite satisfactory and tend to give a more permanent surface in a very economical way.

I would call attention to the fact that the Department is now spending over one half of the total appropriation for streets or \$3,675.00 on oil and tar, and are faced with a growing demand from the townspeople to increase our surface treatments using oil or tar.

The bridge appropriation was used to replank the bridge over the brook on Peabody Street, also the bridge on Liberty Street and part of the bridge on Lake Street, near the sawmill.

The appropriation for fencing was used to construct new fences on Forest and Essex Streets. These were built of cable construction and provide a safety guard at dangerous points.

The sidewalk appropriation was used to widen and take out the sod on most of the gravel walks in town.

I am again grateful to the townspeople for their support and to the Massachusetts Department of Public Works for their co-operation this past year.

Respectfully submitted,

J. ROY OSBORNE, Highway Surveyor.

Police Department Report

To the Honorable Board of Selectmen :

Gentlemen :

The Chief of Police submits herewith to your Board a report for the year ending December 31, 1931, together with recommendations as to the more important requirements of the department for the ensuing year.

For four months during the summer an officer was on duty every evening at the station. This service the men volunteered to donate in order that there would be an officer on call when most needed. A telephone was installed and many people made use of the service, especially summer residents who own property here. The reason for discontinuing this service was the lack of heat in the station.

The station was inspected by a State Board of Health doctor.

The department is still in need of equipment to carry on efficient work. The men have given their time and efforts (a great deal of it free) and I wish to thank them for their co-operation. I would recommend that at least three more special officers be added to the list so that it will not be necessary to borrow officers from adjoining towns.

An officer has been on duty every day at the school house by the request and expense of the school department.

WORK OF THE DEPARTMENT

Total number of arrests	56
Residents arrested	10
Non-residents arrested	46

Presented for the Following Crimes:

Driving under the influence of liquor	2
Driving without a license	2

Report of the Board of Assessors

In spite of the continued inactivity in new building, Middleton has maintained a satisfactory increase in its valuation. On April 1, 1931, the total valuation, real estate and personal was \$1,959,101, an increase of \$115,351 over 1930. At the present time there are 1,049 persons or corporations assessed on property in Middleton, and the number of buildings classified as permanent residences are now 410.

It is a source of great satisfaction to your assessors to be able to announce a tax rate of \$23.20, a decrease of \$5.60 over the previous year. This was due in a large measure to decreased appropriations. The automobile excise tax on 508 cars registered in Middleton amounted to over \$3,600, a slight increase over 1930.

The assessors this year are asking for an increase of \$75 in their appropriation, to pay for services of a clerk. There are few citizens in this Town that appreciate the amount of clerical work necessary in the assessors' department. By careful record kept the past two years, it takes slightly over 176 hours of steady work to write up the assessors' books. The names, addresses and the amount of tax on property and automobiles, a total in 1931 of 1460 items has to be furnished to the tax collector in addition to the regular books. Since 1926, when the Town first began to appropriate \$600 for assessors' salaries the work has more than doubled, and we are therefore asking for this slight increase in appropriation.

Respectfully submitted,

ROGER F. CLAPP, Chairman.
WILLIAM W. RICHARDSON.
LYMAN S. WILKINS.

Board of Selectmen Report

Citizens of Middleton:

In conformity with general practice and custom, your Board of Selectmen submits for your approval a report of the activities of the Board for the year ending December 31, 1931.

It is fitting and proper at the outset of this report that we give expression of our appreciation for the help and co-operation of the various clubs, organizations and individuals who have contributed to the welfare of the unemployed.

The work of these societies and individuals is highly commendable and the Town is grateful for their continued co-operation.

Your Board has been active in obtaining work for the unemployed. We have appealed to County and State Departments in their behalf that relief might be forthcoming.

As this report is being written the Board in their appeal to the State Department of Conservation was fortunate in obtaining work for ten men.

It has been the policy of the Board to advise the use of the unemployed by the various municipal departments as much as possible. In common with every citizen, we view with abhorrence the adoption of a system destructive of self-reliance, initiative and ambition on the part of the citizen and the depletion of the assets of the Town without tangible return.

In submitting a résumé of the activities of the Board of Health for the year 1931, it is indeed gratifying to be able to report a decrease in the number of contagious diseases reported and a marked decrease in the number of Middleton patients at the Essex County Sanatorium. This situation is particularly gratifying in view of the usual effect of poor economic conditions upon the human being with its toll of malnutrition, lowered efficiency and increase in disease.

In view of the recent practice of disposing of rubbish along the streets and the creation of private dumps which are not only unsightly, but are a menace to Public Health, it is recommended that the Town acquire a suitable location, the same to be used as a Public Dump.

Among the Highway improvements that should receive serious consideration, and one in which your Board has been particularly interested, is the reconstruction of Boston Street.

We have made arrangements with the State Highway Commission for this project—one in which will involve a total expenditure of \$120,000.00 in three years and requiring but a small percentage of the total expenditure from the Town. This project is dependent on the County assuming their proportionate part.

It is impossible in a report of this character to enumerate in detail the improvements that have been made during the year. Among the improvements that are worthy of note are the macadamizing of all street crossings and the removal of the pole at the corner of South Main Street and Maple Street.

As a measure of Public Safety, these improvements were required of the Eastern Massachusetts Street Railway Company at their own expense.

In our endeavor to give to the people of Middleton the advantage of another Public Utility, your Board investigated and interested several gas companies to make a survey of Middleton. The results of such surveys proved to be quite satisfactory.

It is our opinion that the townspeople will enjoy, in the not too distant future, the advantage of gas for heating and cooking purposes.

There are several drainage problems which will confront the Board in 1932. These conditions should be corrected and the correction of the same should involve no expense to the Town.

In conclusion of this report, we wish to be recorded as in favor of curtailment of unnecessary expenditures this year. Let us keep our taxes down to the lowest possible point, for by so doing we can be of no greater service to ourselves and to our Town.

During our term of office, we have conscientiously tried to do our duty. We have taken an oath to faithfully and impartially discharge and perform all the duties incumbent on ourselves as Selectmen according to the best of our abilities and understanding.

The conclusions rendered by the Board after conscientious consideration register the opinion of a majority of its members. No other course is possible under our system of Town government. We have implicit confidence that in the long run the results will reflect the wishes of a majority of the townspeople. They elect us to exercise all the capacity that we possess. By so doing, we shall merit and receive the approval of those we serve.

Respectfully submitted,

ARCHIBALD L. JONES.
HARRY B. CROXFORD.
GEORGE B. OGDEN.

Fire Department Report

To the Board of Selectmen :

I hereby submit a report for the Fire Department from May 10, 1931 to December 31, 1931.

On May 1st, we organized with sixteen men, including a chief, deputy chief and four lieutenants.

Our 2½ inch hose was tested at 180 pounds pressure to insure out of town apparatus hooking a pumper on.

During the 7 months we have had a total of 38 fires—30 forest, 5 building and 3 automobile fires, with a cost to the department of \$469.85. The estimated loss to buildings was \$6,975.00 and to automobiles, \$326.00.

We laid 2,000 feet of the 2½ inch hose. Danvers responded to 3 calls. North Reading was called once with no charge to the town.

Middleton responded to two out of town calls, one at North Reading and one in North Andover at the State Forest, with a cost to the town of \$61.60.

In three instances, if we had had a combination booster tank and pumper, the damage to buildings would have been much less.

With the co-operation of the Selectmen, we installed a hot water heater at the hose house which is a great benefit, because it makes it possible to keep the truck where it rightly belongs and also enables quick starting.

70 fuel oil permits and 701 fire permits were issued.

The following are a few suggestions which would be beneficial to the Fire Department :

1. The hose house is badly in need of repairs. It needs a new floor, and four pair of doors. Also a hose tower. The siren needs repairing.

2. There should be a small amount of money set aside for the prevention of forest fires. In looking through other town fire reports, I find that those having their forest patrolled during a dry period, seem to cut down fires considerable. The State Forester recommends a small appropriation set aside for this purpose.

3. The Town is badly in need of a combination pumper and booster tank. On the outskirts of the Town, this piece of apparatus is a necessity, whereas even in the center of the Town the hydrant pressure is very low, averaging about 55

pounds. There is hardly a building in Town that doesn't require at least 500 feet of hose to be laid, and with a friction loss of about 33 pounds to every 500 feet of hose, there isn't much pressure at the nozzle. Pressure is absolutely necessary to fight a fire successfully.

Respectfully submitted,

LEON N. SOPER,

Fire Chief and Forest Warden.

Report of the Cattle Inspector

To the Honorable Board of Selectmen:

Gentlemen: We have 435 head of cattle in town and all seemed in good condition, but the Director of Animal Industry for the purpose of making a Tubucular test hereby declares the town of Middleton to be a quarantine area in which their probably will be found reactives as in all other herds which will have to be disposed of immediately for slaughter and all barns and stalls where cattle have been kept will have to be cleansed and disinfected in accordance with the rules of the animal industry and none but White Papered cows from accredited herds put back when milk is to be sold.

SWINE

There are 700 in town. There has been one case of hog cholera but premises were immediately quarantined and all animals disposed of.

DOGS

Have had three complaints where people were bitten but the dogs were immediately tied up for a term of (14) days. Nothing serious has happened, but such dogs have been liberated.

Superintendent's Report

To the School Committee :

Madam and Gentlemen : I submit herewith my eighth annual report as Superintendent of Schools.

This year I have made the report in the form of a questionnaire, such as any interested citizen might put before those charged with the administration of the local school system. It is hoped by this method to put before the voters some very important information concerning the support and administration. This information is not often available without tedious research from sources not easily accessible.

NUMERICAL INFORMATION

What is the population of Middleton?

1,712—according to the census of 1930.

What persons are required by law, to attend school?

All between ages of 7 and 16 years, but a child of 14 may leave, under certain conditions, to go to work, provided he has completed the sixth grade or its equivalent.

How many pupils were enrolled in the elementary schools?

201 were enrolled in school on October 1, 1931.

How many pupils attend Danvers High School?

56. The largest number for many years.

ORGANIZATION

What is the form of organization of the Middleton Schools?

We are operating on what is known as the 8-4 plan.

This means 8 years in the elementary grades and 4 years in the High School or Vocational School.

Is this a modern type organization?

No. It is what is known by its opponents, as the traditional-meaning old-fashioned-type of organization. This distinguishes it from the 6-3-3 plan in vogue in places like

Danvers, where they have junior high schools, and divide the grades into six elementary, three junior high, and three senior high. There is also the 6-6 plan, wherein the division is into six elementary and six high school grades.

Would one of the more modern plans be desirable for Middleton?

No. No plan involving the support of a local high school would be economical as long as the high school enrollment remains less than 100 pupils. This, of course, provided we can continue to find accommodations for our high school pupils in towns not too distant from Middleton.

What is our method of promotion?

We promote annually on the basis of the child's ability to do the work in the next grade. When in the judgment of the teachers and superintendent it is for the child's best interest to repeat the work of any grade, we act accordingly. Double promotions are permitted in rare cases, and only when it seems unjust to the child to hold him to the pace of the average.

What subjects are required by law to be taught in the elementary grades?

Reading, writing, spelling, English language and grammar, geography, arithmetic, history and constitution of the United States, civics, physiology, and hygiene, physical education, drawing, and good behavior.

What additional subjects do we teach?

Music, manual training, sewing, and thrift.

They may have the full benefits of the course at Danvers High School, Essex County Agricultural School, or in the Vocational schools of nearby cities.

Is the town obliged to provide this vocational education?

Yes, according to the statutes of the Commonwealth. One-half of the cost of such tuition and transportation is borne by the state.

What provision is made for the special instruction of retarded children?

None, as yet, there being too small a number to make such a class an economical proposition. We do, however, have a class which gives special help to those children who do not seem to be able to keep pace with the regular classes in the school. These are grouped and given much more individual instruction than is possible in the large classes.

ADMINISTRATION

How many members has the School Committee?

Three, one being elected each year.

What are their powers?

Individually, none; collectively or by majority vote, they have absolute control, as representatives of the voters, over all questions relating to the conduct of the schools, not already covered by state law.

What are the duties of the School Committee?

It has entire control of the schools. It adopts the budget and determines how the appropriation shall be expended. It elects all school employees, examines and approves all changes in school organization, courses of study, and changes in textbooks. It authorizes all repairs and changes in the physical equipment of school buildings.

What are the duties of the Superintendent of Schools?

He is the advisory and executive officer employed by the Committee, as an expert, to carry out all plans and policies of the Committee. He acts for the Committee to make sure that the work of all its employees is carried on with promptness, efficiency, and economy. His duties are many more than these, but his general function is as stated. He is the first person who should be consulted on any question concerning any school activity. The Committee should only be asked to

act as a final court of appeal from his decisions, thus conserving the time and energy of this body.

How many persons are regularly employed by the School Committee?

1—Superintendent of Schools.

6—Teachers.

3—Supervisors.

1—Nurse.

1—School Physician.

1—Janitor.

1—Attendance Officer.

BUILDING AND EQUIPMENT

Is the Center School meeting our needs as to capacity, physical conditions, and equipment?

In general the conditions are satisfactory for our present enrollment and distribution of pupils. Any marked increase, however, will make necessary a reorganization of the work. As it is now there is difficulty in fitting the large manual training classes into space necessarily restricted by the presence of class room furniture. We may eventually be forced to give up this type of education for lack of space in which to conduct it. It may be possible to make the basement room beneath the newer part of the building usable for this purpose. This will involve the solution of the problem of light and ventilation.

A notable addition to the building's equipment was accomplished by the teachers and pupils of the school. They have installed radio with individual loud speakers in three rooms used by the upper grades. This is but another evidence of the way in which this school unit keeps pace with the times.

FINANCIAL FACTS

The following information comes from the report of the State Department of Education and is for the last complete *school* year ending June 30, 1931.

What was the amount spent for support of schools?
\$22,086.79.

How much from local taxation?
\$17,110.78.

Who paid the difference?
Commonwealth \$4,976.01.

What for?

\$1,070.00—From income tax for teachers salaries.

312.87—From General Fund-Regulator state aid.

386.67—On salary and expenses of Superintendent.

1,840.47—On High School tuition.

1,366.00—On High School transportation.

What effect does this have on local cost of education?

It reduces it from \$91.65 per pupil to \$71.00, or about 22%. In other words the state pays 22% of the cost of education of each child in Middleton.

What is the cost per pupil for high school education?

\$127.62 for both tuition and transportation. One half of this is refunded by the Commonwealth. The net cost to the town is \$63.81.

Do these refunds effect the appropriation?

No. The money has to be appropriated and expended before it is refunded. The effect is on the tax rate. It is made much lower.

What does the \$1,070.00 from income tax "for teachers' salaries" mean?

This is a refund made to cities and towns to help pay teachers a just salary. It varies in amount with the salary,

training, and experience of the teachers; the amounts ranging from \$100.00, to \$200.00 per teacher.

Does the state also pay a part of the salary and expenses of the Superintendent of Schools?

Yes. Last year it paid \$386.67 of the \$756.08 paid to him, that is, more than half of the total.

Why does the state pay these sums?

To help equalize the educational opportunity for all children in the state, by helping the towns in proportion to their inability to pay. The richer the town, the less it is helped.

What is the annual cost of transportation within the town?
\$4,000.00 for the elementary schools.

Do we have to pay this?

Yes. It is a legal requirement when demanded by parents of children living two miles or more from the school of attendance.

Could we do away with this expense?

Yes, by unanimous agreement of all entitled to this service.

What is the largest school expense?

Teachers' salaries.

\$8,050 in 1931 first year.

What is the average per teacher?

\$1,341.66, compared to a state average of \$1,702.00—25% below it.

What is the cost per pupil per day for teaching?

22c. per pupil-day.

How many would even take care of the average youngster at home for 22c. a day? We teach them also.

GENERAL OBSERVATIONS

There are probably many other questions of interest concerning the operation of the local school system. I have tried to state and answer those questions most commonly asked of school officials.

A greater number than usual should read this report because it contains information which should be of special interest and importance in these times when expenditures are so carefully scrutinized. It is the writer's opinion that the expenditures of the school department will bare any examination with credit to the School Committee.

On pages which follow will be found tables showing the number and distribution in the grades of elementary school children of the town.

CONCLUSION

This year has as usual been marked by a spirit of helpful co-operation on the part of the School Committee and the teachers. Under such condtions a school system is bound to progress.

Respectfully submitted,

STEPHEN G. BEAN,

Superintendent of Schools.

TOWN WARRANT

AND

RECOMMENDATIONS

OF THE

FINANCE COMMITTEE

OF THE

TOWN OF MIDDLETON

MARCH, 1932

PART III

Town Warrant Meeting

The Commonwealth of Massachusetts

Essex, ss. To William H. Young, Constable for the Town of
Middleton, in the County of Essex :

GREETING :

In the name of the Commonwealth of Massachusetts, you
are hereby directed to notify and warn the inhabitants of said
Town, qualified to vote in elections and in Town affairs to
meet at the Town Hall in said Town, on

Tuesday, the Fifteenth day of March Next

at eight o'clock in the afternoon, then and there to act on the
following articles :

ARTICLE 1. To authorize the Selectmen to appoint such
other Town Officers as are required to be chosen annually.

ARTICLE 2. To see what action the Town will take in
defraying the Town expenses for the ensuing year.

ARTICLE 3. To see if the Town will vote to authorize
the Treasurer, with the approval of the Selectmen, to borrow
money in anticipation of the revenue of the current year, and
expressly made payable therefrom by this vote.

ARTICLE 4. To see if the refund of dog taxes shall be
transferred to the Library fund.

ARTICLE 5. To see what action the Town will take in regard to letting the Town Hall.

ARTICLE 6. To see if the Town will vote to share in the expense of any telephones installed in other than public buildings.

ARTICLE 7. To see if the Town will vote to authorize the transfer of the unexpended balance of the Electric Light Department of 1931 to the credit of the department of 1932, agreeable to the petition of the Electric Light Commission.

ARTICLE 8. To see if the Town will vote to authorize the Electric Light Department to use the earnings of the department for the ensuing year, agreeable to the petition of the Electric Light Commission.

ARTICLE 9. To see if the Town will vote to purchase a constant current transformer, for street lighting, and appropriate the sum of \$425 to purchase the same, agreeable to the petition of the Electric Light Commission.

ARTICLE 10. To see if the Town will vote to purchase a new truck, with snow plough equipment, for use in the highway department, and appropriate the sum of \$1,100 for the same.

ARTICLE 11. To see if the Town will appropriate the sum of \$7,500 for additional fire apparatus and repairs on the hose house.

ARTICLE 12. On petition of B. Gertrude Hayward and others, to see if the Town will vote to oil Mt. Vernon Street

from Maple to King Street, and appropriate money for that purpose.

ARTICLE 13. On petition of Eugene Pelletier and others, to see if the Town will appropriate a sum of money to be expended for gravel and repairs on Park Avenue, Haswell Park.

ARTICLE 14. On petition of Maurice B. Webb and others, to see if the Town will vote to appropriate a sum of money sufficient for gravel and repairs on Webb Street.

ARTICLE 15. To see if the Town will vote to appropriate the sum of \$1,000 for a Reserve Fund in accordance with Section 6 of Chapter 40 of the General Laws, to meet extraordinary or unforeseen expenditures. No transfer can be made from this fund except by a vote of the Finance Committee.

You are hereby required to notify and warn said qualified voters to meet at an adjourned meeting at the Town Hall, on Monday, March 21 next for the following purposes, viz :

To choose by ballot the following Town Officers for the ensuing year :

Moderator, Town Clerk, three Selectmen, one Assessor for three years, one member of Board of Public Welfare for three years and one for one year, one member of School Committee for three years, Highway Surveyor, two Trustees of Flint Public Library for three years, Constable, Treasurer, Tax Collector, Tree Warden, Superintendent of Burials, Custodian of Town Hall, one Water Commissioner for three years, one Cemetery Commissioner for three years, one Electric Light Commissioner for three years.

The polls will be open at 6.15 o'clock, A. M. and shall be closed at 5 o'clock, P. M.

And you are directed to serve this Warrant, by posting up attested copies thereof, one at the Town Hall, one at the Center Post Office, and one at the store at Howe Station in said Town, seven days at least before the time of holding said meetings.

Hereof fail not, and make due return of this Warrant, with our doings thereon, to the Town Clerk, at the time and place of meeting, as aforesaid.

Given under our hands this sixteenth day of February, in the year of our Lord, one thousand, nine hundred and thirty-two.

ARCHIBALD L. JONES,
GEORGE B. OGDEN,
HARRY B. CROXFORD,
Selectmen of Middleton.

A true copy.

Attest: WILLIAM H. YOUNG, Constable.
